Intrasense™ presents its innovations at JFR 2019 show

Intrasense™ (FR0011179886 - ALINS), specialist in medical imaging software solutions and Myrian® designer, will be present from 11 to 14 October at the 67th edition of the Journées Francophones de la Radiologie (JFR). The show will be held at the Palais des Congrès in Paris (Porte Maillot). The 2019 edition will be devoted to the "increased radiologist". Every year The JFR are an opportunity for exchanges between clinicians, industrialists and start-ups, and welcome more than 12,000 visitors.

Many novelties presented

Intrasense™ will present during this show its many innovations. First, the new version of Myrian® (2.7), optimized to make the user experience simpler and more intuitive. Intrasense™ will also present a new clinical application dedicated to the visualization of mammography examinations which enriches a very complete catalog of clinical applications. Other applications have also benefited from important updates, such as Myrian® XP-Colon, which is highly enriched in features, as well as the application dedicated to heart and coronary exam Myrian® XP-Cardiac.

All these clinical innovations can be tested on our booth #213A. You will also discover our full range of clinical applications and our Myrian® Studio innovation accelerator.

Myrian® Imaging Layer, Clinical Apps and Myrian® Studio

Intrasense™ experts will be present to make you discover all the features and richness of the products, including Myrian® Studio, the offer dedicated to the development of clinical applications, and to help you discover the artificial intelligence solutions integrated into the Myrian® platform and developed in partnership with 12Sigma, Quantib, AZmed or Deski.

Intrasense™ partner of JFR

Intrasense™ will showcase the effectiveness of Myrian® Imaging Layer's clinical workflow in real-life situations through the many clinical workshops run by renowned radiologists on the Myrian® platform. These 8 workshops will present the concrete uses of clinical applications like Myrian® XP-Colon during a virtual colonoscopy workshop or Myrian® XP-Liver during a case presentation of monitoring liver metastases.

About Intrasense™

Founded in 2004, Intrasense develops and markets a unique medical device named Myrian®, a software platform facilitating and ensuring diagnosis, decision-making and therapeutic follow-up. Thanks to Myrian®, more than 1000 hospitals and clinics spread over 40 countries use a unique and integrated platform supporting all types of imaging modalities (MRI, scanner...). Enriched with expert clinical modules dedicated to specific pathologies and organs, Myrian® provides a universal medical image processing solution which can be fully integrated into any healthcare information system. Intrasense has more than 40 employees among which 20 are dedicated to Research & Development. Intrasense has been labelled 'innovative company' by the BPI and has invested more than 10 million euros in Research & Development since its creation. More information on: www.intrasense.fr
