## Intrasense™ Showcases Innovative Solutions at RSNA 2019

Intrasense™ (FR0011179886 - ALINS), specialist in medical imaging software solutions and Myrian® designer, will showcase its latest innovations at the world-renowned Radiology Society of North America (RSNA 2019). The entire Intrasense™ team will welcome you from December 1st until December 5th on booth #6956 (North hall B level 3), introducing you to the newest version of Myrian® and its new Clinical Apps. The RSNA is the world's largest exhibition dedicated to medical imaging, with more than 50,000 attendees every year.

### Artificial Intelligence at the heart of innovation

Intrasense™ will take this opportunity to present number of innovative solutions based on artificial intelligence. The new version of the Myrian® platform embed new applications enabling artificial intelligence to truly be embedded into the daily workflow and clinical routine.

Among other novelties, the following solutions codeveloped with Intrasense and based on Myrian® Studio will be presented : an application for automatic detection of bone lesions based on AZMed technologies; 12Sigma technology based solution for automatic detection of pulmonary lesions; A solution from Intrasense™ partner Quantib which allows the segmentation and the quantification of cerebral parenchyma to diagnose neurodegenerative diseases.

### Many novelties presented

Intrasense™ will present for the first time on the North American market the new version of the platform Myrian® (2.7). A real substantive work was done on this new version including user experience which benefited from many improvements. Simplified and optimized, the platform becomes even more intuitive.

Intrasense™ development teams have also focused their efforts on Clinical Apps with a new clinical application dedicated to the visualization of mammography exams, Myrian® XP-Mammo, completes the rich catalog of applications. Other applications have also benefited from important updates, as for example Myrian® XP-Colon which is endowed with many additional features. This is also the case

of the Myrian® XP-Cardiac application dedicated to the examination of the heart and coronaries.

All these clinical innovations can be tested on booth # 6956 (North hall B level 3). A special focus will also be made on Myrian® Studio innovation accelerator.

### About Intrasense™

Founded in 2004, Intrasense develops and markets a unique medical device named Myrian®, a software platform facilitating and ensuring diagnosis, decision-making and therapeutic follow-up. Thanks to Myrian®, more than 1000 hospitals and clinics spread over 40 countries use a unique and integrated platform supporting all types of imaging modalities (MRI, scanner...). Enriched with expert clinical modules dedicated to specific pathologies and organs, Myrian® provides a universal medical image processing solution which can be fully integrated into any healthcare information system. Intrasense has more than 40 employees among which 20 are dedicated to Research & Development. Intrasense has been labelled 'innovative company' by the BPI and has invested more than 10 million euros in Research & Development since its creation.
