

Intrasense announces strategic partnership with EDL, French leader in digital healthcare solutions

Montpellier, France, October 18, 2023 at 5:45 PM CEST

Intrasense (FR0011179886 - ALINS), specialist in medical imaging software solutions and designer of Myrian[®], has announced the signature of a strategic partnership with EDL. French leader in software packages for technical platforms of public and private healthcare establishments, EDL develops Xplore[®], a radiology solution. This partnership will enable the integration and marketing of Myrian[®] clinical applications in the Xplore[®] suite.

EDL, a major player in digital healthcare in France

EDL, a leading French player in medical imaging, has chosen Myrian[®] and its clinical applications to enhance its product portfolio in France and Europe. Developer of Xplore[®] multimodality solutions including PACS, RIS and teleradiology, EDL also integrates AI tools in its platforms, enabling optimal patient care.

With a significant presence on the French market, EDL has become a key player for public institutions in France. Today, EDL has a strong presence in Western Europe, particularly in Germany, with over 600 French and international customers and 20,000 daily users, playing a central role in the digital healthcare sector.

Distribution of Myrian[®]'s complete range of applications

Under this partnership, EDL will offer its customers Myrian[®] clinical applications as a complement to its Xplore[®] medical storage and display offering. The Myrian[®] applications, selected for their ability to integrate expert functionalities per organ and per pathology, will be natively integrated into EDL solutions for a better user experience.

Under the terms of the contract, all Myrian[®] modules for MRI and CT, as well as all specialized modules, will be distributed to EDL customers.

Xplore[®] users will have access to a complete range of specialized modules and tools for image interpretation and medical diagnosis. The alliance of Xplore[®] and Myrian[®] will offer healthcare professionals a complete suite of innovative solutions to meet the growing needs of medical imaging.

A strategic partnership on the French and European markets

This partnership will enable Intrasense to establish a stronger position among French public institutions, with one of their benchmark partners. It offers EDL the opportunity to expand the functional scope of its solutions, benefit from the clinical offering of Myrian® applications integrated with Xplore® PACS and to differentiate its offering in its markets.

This all-French collaboration strengthens Intrasense's position as a key player in medical imaging on the French market, while supporting its international expansion objectives.

"We are delighted to have concluded this fine partnership of major players in French imaging at the JFR 2023 (Journées Francophones de Radiologie). It marks the start of a successful collaboration between Intrasense and EDL, to bring innovative medical imaging solutions to France and Europe" says **Nicolas Reymond, Intrasense CEO.**

"EDL is delighted with its partnership with Intrasense, a marriage that enriches and completes our PACS Xplore® offering, propelling our solution into a new dimension of visualization anywhere and everywhere. It's a union of expertise and innovation" emphasizes **Frédéric Camboulives, EDL CEO.**

About Intrasense

French expert in medical imaging since 2004, Intrasense develops and markets software platforms in 40 countries, facilitating and securing diagnosis, decision-making and therapeutic follow-up.

Myrian®, an advanced visualization solution for radiology, provides 1,200 healthcare establishments with clinical applications to help interpret all types of images. Since 2021, Intrasense has been developing a new platform dedicated to oncology, multidisciplinary and collaborative, to optimize patient care and follow-up.

A Guerbet Group subsidiary since June 2023, Intrasense continues to enhance its solutions by integrating artificial intelligence algorithms in medical imaging. Its teams work closely with healthcare professionals to help save lives.
