

Alexandre SALVADOR appointed CEO of Intrasense to accelerate strategic repositioning on high value-added medical solutions integrating AI in radiology

Montpellier, France, August 27, 2024 - 5:45 p.m. CEST

The Board of Directors of Intrasense (FR0011179886 - ALINS), meeting on August, 26 2024 at 5:30 pm under the chairmanship of Mr. François NICOLAS, has decided to appoint Mr. Alexandre SALVADOR as Chief Executive Officer of Intrasense.

Alexandre SALVADOR succeeds Nicolas REYMOND, who has held this position since 2018.

The Board's decision was motivated by the desire to accelerate the company's repositioning on high value-added medical solutions, integrating artificial intelligence in radiology. This repositioning is based on an ambitious product roadmap, the first stages of which recently obtained regulatory approvals in Europe. The aim is now to achieve significant sales growth.

In this context, Alexandre SALVADOR's background makes him a highly experienced leader to lead this strategic acceleration of the company. In particular, he has played a key role in the strategic transformation and development of innovative digital healthcare businesses integrating Artificial Intelligence (AI) at companies such as Agfa Healthcare, Philips Healthcare, CSL Behring, and in his last position at Bayer Pharmaceuticals as Vice-President and Global Head of Digital Solutions in Radiology.

Under his leadership, Intrasense will aim to accelerate its strategic repositioning while pursuing a policy of continuous innovation, responding to the growing needs of healthcare professionals for the benefit of their patients.

We extend a warm welcome to Alexandre SALVADOR, and wish him every success in his new role.

About Intrasense

A French expert in medical imaging since 2004, Intrasense develops and markets software platforms in 40 countries, facilitating and securing diagnosis, decision-making and therapeutic follow-up.

Myrian®, an advanced radiology visualization solution, provides 1,200 healthcare establishments with clinical applications to help interpret all types of images. Since 2021, Intrasense has been developing Liflow®, a new platform dedicated to multidisciplinary and collaborative oncology, to optimize patient care and follow-up.

A Guerbet Group subsidiary since June 2023, Intrasense continues to enrich its solutions by integrating artificial intelligence algorithms in medical imaging. Its teams work closely with healthcare professionals to help save lives.
